

NEEDED: Post-Transplant Funding Advocate for Zuleica

Are you wondering how you can help Zuleica recover after her kidney transplant?

Zuleica needs an advocate, one or more people to step up to the challenge of investigating and securing funding for her post-transplant medications.

- Zuleica will need approximately \$10,000 per year for anti-rejection medications and others until she can get a job and her own medical coverage.
- These post-transplant medications are essential to Zuleica's recovery.
- Zuleica's advocate(s) will research organizations and institutions that may be able to provide the necessary funding.
- This is a wonderful opportunity for someone who is good at researching online or via telephone.
- If you are blessed with these gifts, why not put your abilities into action and volunteer to help Zuleica?
- The need for secured funding is immediate!
